President of the European Parliament **Roberta Metsola**,
Member of the European Parliament **Dr. Sergey Lagodinsky**

I, a citizen of the Russian Federation, protest against Russia's military aggression in Ukraine! I, a citizen of the Russian Federation, consider Ukraine a democratic country with a legitimately elected President, Volodymyr Zelenskyy!

I, a citizen of the Russian Federation, deeply respect the heroic Ukrainian people!

I, a citizen of the Russian Federation, confirm that the President of the Russian Federation Vladimir Putin betrayed the interests of my country and plunged the world into disaster!

The aggressive actions of the Kremlin regime are destroying the humanitarian values of the people, including the Russian people and causing irreparable damage to European civilization.

Now it is quite obvious: the goal of the Kremlin regime is not only to enslave the people of Ukraine, but also to build a new world order. In its aggression, the Kremlin will not shy away from further predatory actions against other countries. If the Kremlin is not stopped militarily now, tomorrow Russian missiles will fly to Berlin, Warsaw, London. Economic sanctions are extremely important, but they are not enough to contain the aggressor.

The policy of non-interference and the hope of controlling the attacker's appetite is criminal. You will have a fatal outcome. As after the Munich Agreement in 1938.

Dear President of the European Parliament **Roberta Metsola**

I, a citizen of the Russian Federation, request and demand immediate military assistance for Ukraine (supply of lethal weapons)

I, a citizen of the Russian Federation, request and demand military rejection of the Russian army led by Vladimir Putin!
